

MSIT 5910-01 Capstone Project — Unit 7

Part B: System Maintenance Plan — Extracted Tables

University of the People | Term 4, AY2026

B1. Maintenance Strategy

Table 3. Maintenance Schedule — Seven Recurring Activities Across All Four Maintenance Types

Frequency	Activity	Type	Owner
Weekly	Check KPI scorecards for data gaps or anomalies	Corrective	Analytics Lead
Weekly	Verify API connector authentication tokens are active	Preventive	IT Admin
Monthly	Upload broadcast CSV for the previous month	Adaptive	Analytics Lead
Monthly	Review and update RBAC user access list	Adaptive	IT Admin
Quarterly	SUS usability re-assessment with stakeholders	Perfective	Analytics Lead
Quarterly	Security audit of API credentials and access logs	Preventive	IT Admin
As needed	Fix bugs reported via Redmine issue tracker	Corrective	IT Admin

Colour key: Red = Corrective | Blue = Preventive | Amber = Adaptive | Green = Perfective

Type	Definition
Corrective	Fix defects discovered after deployment (e.g., formula errors with production data)
Adaptive	Update system as external environment changes (e.g., new connector, CSV format change)
Perfective	Implement enhancements requested by stakeholders (e.g., content-level search filter)
Preventive	Reduce future failure risk through audits and documentation updates

B3. Risk Identification and Mitigation

Table 4. Post-Deployment Risk Register — Six Risks with Likelihood, Impact, and Mitigation

Risk	Likelihood	Impact	Mitigation
API token expires or is revoked	Medium	High	Token expiry alerts; credentials in Secret Manager
Meta or Google deprecates a required API field	Low	High	Monitor API changelog; version-controlled config for rollback
Dashboard link shared outside organization	Medium	Medium	Enforce Restricted access; monthly share audit

Broadcast CSV upload delayed or incorrectly formatted	High	Medium	Standardized upload template and SOP; Make.com automation in v1.1
Google Looker Studio service outage	Low	High	Blue workspace as fallback; monthly PDF snapshots exported
Staff turnover — key user leaves without handoff	Medium	Medium	User manual in /docs; handoff training protocol

Colour key — Red = High | Amber = Medium | Green = Low (applied to both Likelihood and Impact columns)

B2. Version Roadmap

Table 5. Semantic Version Roadmap — Planned Releases Derived from Maintenance Plan

Version	Type	Key Changes / Scope	Status
v1.0.0	Major release	Initial deployment: 5 KPIs, date/platform filters, PDF export, RBAC access control	Released
v1.0.1	Patch	BUG-01 zero-guard fix; BUG-02 Meta field alias normalization; BUG-03 Geo Map date range fix	Released
v1.1.0	Minor release	Make.com automation for broadcast CSV upload (LIM-01 resolution); content-level search filter (stakeholder request)	Planned
v1.2.0	Minor release	TikTok connector addition (adaptive); expanded SUS assessment with ≥5 participants (LIM-02)	Planned
v2.0.0	Major release	Full multi-platform connector refresh; custom mobile-responsive layout; enhanced advertiser export templates	Backlog

Version naming follows semantic versioning (MAJOR.MINOR.PATCH). Roadmap derived from maintenance narrative in B2 and open issues LIM-01 and LIM-02.
